👤 Profile

Computer Science and Artificial Intelligence graduate with 2+ years of experience as a Coding Instructor, teaching children and teenagers aged 6–18 through online and offline sessions. Experienced in delivering project-based programming education using Scratch, mBlock, Pictoblox, web development, app development, and game development. Skilled in adapting teaching methods to different learning levels, encouraging creativity, problem-solving, and computational thinking, and guiding students through hands-on projects and final projects.

📋 Internship

Diploma in Full-Stack Development with PHP
from the Information Technology Institute (ITI)
– 4 months

🎓 Education

2020 – 2024	-Bachelor's Degree in Computer Science and Artificial Intelligence
Benha, Egypt	<i>Benha university</i>

👜 Professional Experience

Coding Instructor at iSchool | 2+ Years of Experience

- Delivered **project-based coding education through 800+ online and in-person sessions**, supporting students through both group and one-on-one learning formats.
- Provided **one-on-one coding instruction to 66+ students** and delivered group sessions with **20+ students per group** at Demi and Deci.
- Taught coding and programming concepts to students of different ages and learning levels, adapting teaching approaches to meet individual learning needs.
- Guided students through **hands-on coding projects**, with each student completing a **final project at the end of the course**.
- Managed and followed up with **multiple student groups**, monitoring progress and providing individualized feedback.
- Simplified technical concepts into engaging, age-appropriate learning activities while developing students' **logical thinking, problem-solving, creativity, and computational thinking skills**.
- Delivered sessions across **online and physical classroom environments**, maintaining an engaging and interactive learning experience in both settings.

Freelance Front-End Developer

- Designed and developed responsive landing pages using **HTML5, CSS3, JavaScript, and Bootstrap**.
- Delivered high-quality templates tailored to client needs.

Skills

Version Control

Git, GitHub

Programming

Python, PHP, JavaScript

Database

SQL, SQLite

UI/UX & Design

UI/UX Design, Figma

Mobile Development

Flutter, FlutterFlow, FlutLab, Sqflite

Web Development

HTML, CSS, Bootstrap, Laravel

Game Development:

Unity, Godot, Scratch, mBlock, PictoBlox

Educational Platforms

Code.org [↗](#) ,Replit

Languages

- English (Proficient)
- Arabic(Native)

Projects

landing page [↗](#)

A website developed based on the client's request using HTML and CSS, focusing on creating a design that meets their needs.

Services-Website [↗](#)

A responsive services website developed using HTML5, CSS3, and Bootstrap. The website showcases a range of services with clear and detailed information, focusing on a clean, modern, and user-friendly design. It is fully responsive across different devices and provides smooth navigation and interactions. This project demonstrates my ability to build functional, visually appealing, and responsive web interfaces.

cafeteria [↗](#)

A project developed using **PHP** that allows users to create personal profiles and place orders for their desired drinks. The system includes an admin dashboard where the admin can view all orders, perform various operations on them, create orders on behalf of users, and manage or delete user data and orders. The platform streamlines the ordering process and administrative control, making cafeteria management more efficient and organized.

Freelance-website [↗](#)

A website developed using **Laravel**. The platform serves as a freelance marketplace where companies can create their own profiles to post job opportunities, and freelancers can apply for those jobs. All activities on the platform are managed by the admin, who approves company profiles and reviews freelancer applications before allowing them to apply for jobs.

HR Website [↗](#)

A website developed using **Laravel** as part of a team during the ITI training program to digitize the manual tasks of the HR department, such as attendance tracking, salary management, and employee records, which were previously handled on paper. The system allows HR staff to record employee attendance, manage salaries, and keep a clear record of everything related to each employee, including leaves, deductions, overtime, and absences.

Curd-operations [↗](#)

This project is a web application **built with React** that allows users to browse a collection of books easily. It provides a user-friendly interface where users can view book details, including titles, authors, and descriptions. Administrators have the ability to manage the platform by adding, editing, or deleting books and users. The application is designed for seamless navigation and interaction, ensuring an engaging experience for book lovers. The dynamic nature of the app is powered by React, allowing for smooth real-time updates and an interactive experience.
